STARTING WELL. The World's Fair has gotten into Con'

gress, and yesterday saw the first move n the game. Chicago, St. Louis and New York were well represented, and a good deal of interest was manifested. The result was the adoption of a resolution to the effect that the Speaker appoin a Select Committee of nine men, to be called the World's Fair Committee, to which shall be referred all that relates to the proposed quadri-centennial celebration of the discovery of America. Mr. FLOWER also introduced his World's

Fair bill, which will be referred to this Special Committee when it is appointed. This is a slight setback for Chicago. which wished the matter to be in the hands of the Foreign Affairs Committee. The judicious selection of the nine may be safely left to Mr. REED, and as the nine go to the bat New York may count on enough good batting to win the game.

THE GREAT BILL.

The Children's Bill cannot be too promptly attended to in Albany. NOMS DE PLUME OUT OF DATE. 'Oulds," Mark Twain and Others

Now Write Under Their Own There seems every reason to believe that the day of the nom de plume in literature has gone by, says the Philadelphia Times. Authors of established repu-

the field there is not a modern author of repute completely screened behind an assumed name. "The Du-hess" up to within a short time succeeded in keeping her identity veiled. Sie is, however, now writing under her own name as Margaret Hungerford.

"J. S. of Dale." has entirely discarded that name, and all his books will hereafter be published under his own name. "Sydney Luska" appends his real name now to all his books.

"Outda" is writing her first article under her own signature of Louise de la

Edna Lyall—all these are now becoming
merely the shadow of the real names
which they once so effectually screened
from public knowledge.

The reasons for this change of feeling
are several. First, authors are realizing
more and more that with two names they

have two reputations to make, and in these days of literary competition it fills the hands of any ordinary man to suc-ceed in making one.

Secondly, writers are becoming more convinced that the strength of one's persenality in their work is an essential o Thirdly, publishers are more reluctant

to place pseudonyms on the title pages of their author's books than they were fifteen years ago.
And thus are our methods changing—
